# Theory

Feel like I'm on roll, Feel like I got a plan  
Everything that I touch, I'm on top again  
All figured out, And it ain't hard to do  
I got a theory, And everybody has a clue  
First you get a cup, And fill it to the top  
It don't matter whatever you like drink it up  
Get shit faced, Get fucked up, Get naked, we gon live it up  
Now put your hands up, Now put em down again  
This is Simon says, and I'm controlling this  
I got you NYSYNC with no strings attached  
Could be I'm moving too fast cause I been know for that  
Feel your way through it just like a dark room  
Sorta like a blackout but you wake up at noon  
Don't even know her name but you don't need to  
Just get your shoes hit the door and holler peace hoe

Walk in the club, find the hottest chick  
Do a couple lines, now you can handle it  
Don't get nervous now  
You come too far, you drove drunk 10 blocks, you hit 2 cars  
Now you invincible, Gon do what you do  
Not invisible, man these drugs got you screwed  
I'll be the wingman hopefully she got a friend  
But I been drinking since noon that's why I'm slurring  
I can walk straight balance check all good  
Mind if we sit I don't want to bother you  
They call me Wiz and this is my boy tattoo  
I got a secret and I'm hoping I can fuck you  
I'm moving too fast, now what's your name again?  
So much for memory loss, now can we start again?  
They call me Wiz and this is my boy Tattoo  
I got a limo and I saving it for just you.

This is life we only get 1 let's go  
You pop a e pill, I eat a mushroom  
Look how running down the street like a maniac  
Mama always said boy you too smart for that  
So let's go steal a car and take it for a joyride  
We won't know it anyway man we are too high  
What if jump out a plane with no parachute  
It's kinda crazy when you think of all the shit we do  
But this is life as we know it we living on the edge  
I beat the odds I guess cause I don't think I'm dead  
Maybe I'm dreaming I'm not really on stage  
And I'm asleep in my bed and this fake crowd  
And SEV'N 9 was a band not my birthday  
You say it's hard to understand I'm insulted  
Take a sip stay sane I will sound better  
It's just my theory you will think that I am falsetto

# Accumulation

You can catch us on a one way  
We always stay laid back like a Sunday  
I know it's hard for you to take cause we on top  
We kinda like it up here a whole damn lot  
So you gotta make a choice what its gon be?  
Do you really want him or do you want me?  
I don't really have time can you hurry up?  
I'll have another glass of wine put it in my cup  
I had a whole lotta pain in my lifetime  
It can start with a gift and a hot line  
You can call it what you want ain't a hobby  
If you can feel it in your soul where the party?  
Where the party?

2x - Play it loud in the ears of a faceless crowd  
Were gonna make a sound for everyone who doubts

Pushed to the limit so many times and feel like I'm bout to explode from all the grindin  
This is life on the road that's how we all do it  
See the fork in the road I'm going right though it  
Pull no punches its hard to keep your sanity  
And if your buzz die down they start panicking  
All these people I meet are no friends to me  
Because this music thang is like a fantasy  
But we gotta keep going because we good at it  
Some people label us wrong they call us bullheaded  
This is only a song so don't get rude with it  
I think they all got it wrong and they just don't get it

2x - Play it loud in the ears of a faceless crowd  
Were gonna make a sound for everyone who doubts

So many ways to get the lead out  
And this is all I can take so we gon air it out  
You thought that C-WIZ and Bone was gon fade out  
I say that we here to stay and there ain't no doubt  
Motivated by all that I know now so you hold the applause til I roll out  
We only give it our all  
We don't hold out  
We never settle for less we want it all now  
Cause we the ones that everybody came to see  
I ain't knocking them but its hard to follow me  
We gotta give the people what they really want now  
We a band so you know we gon play it loud

2x - Play it loud in the ears of a faceless crowd  
Were gonna make a sound for everyone who doubts

# My Eyes

*I'm one of them laid back dudes. The kind that don't stress the kind that don't move.  
Never talk about what happens with you  
I keep it under wraps the things that we do  
Remember when we hit the ritz and the view  
was so amazing don't you think so?  
Imma put the do not disturb up on the door  
cause man they come early in these hotels  
Im'ma have a beer. You like a cocktail?  
This is the life I'm under your spell.  
Unplug the phone and throw out the cells  
This a vacay from life unlike jail  
cause I wanta lock you down I won't tell.  
The Rockstar lifestyle never can tell  
But you can bet I never will fail  
But in the end eyes tell the tale.*

*If you look into my eyes you can probably see my soul  
Is it fate for you and I, It's a question I don't know  
We can give one more chance but some things will have to change  
I can almost see it now won't be love without some pain*

*You probably think cuz I'm from Atlanta  
I'm like other guys and we a the same but  
Imma make a stand for own integrity  
If you don't understand this song then let it be  
I love it when we hit the town and paint it red  
But it's about time for us to just spend  
A little more quality time know what I mean  
I'm stuck in the friend zone let me be free  
I'm feeling hot like a hundred degrees  
And if you ever get sick you can count on me.  
I guess I'm just that guy that friend  
The that you love the one that never take advantage of yuh  
So when you feeling real hot and bothered  
I'm so melodic a in the hole like I'm Andy Roddick  
Just close your eyes and think of me and when open them there I'll be.*

*If you look into my eyes you can probably see my soul  
Is it fate for you and I, It's a question I don't know  
We can give one more chance but some things will have to change  
I can almost see it now won't be love without some pain*

*If you look into my eyes  
See my soul*

*I put it all on the table, Heart up on my sleeve  
it's hard for me to do if you not feeling me  
Yea we spend time but it seems sometime  
that we running out of time and I'm wasting my time  
Let's not hesitate cut right to the chase  
It cuts just like a knife  
I'm running low on patience  
Way past the time for sexual sensation  
911 just meet me at the station*
